ome from Detroit, automobile that during the coming summer we may expect to pick up a paper any morning and see where so and so has lowered the road record between most any two important points on our continent. Feats on the speedway and on the beach will likewise be a part of the program. Performances of some cars and the resultant publicity have caused other manu-facturers to sit up and take notice, and they, on their part, desiring some of this same sort of notoriety, are going to at-tack Old Father Time. Ralph Mulford's record of 1.819 miles in twenty-four hours is liable to be very much sought. There are those who predict that the ante will be raised to 2,000 miles before the summer is over. It is understood that "Cannon Ball" Baker, who has just made a transcontinental record, is going out to better his own mark. The make of the car he will drive, he refuses to divulge. All these sort of things are good, they tend to make people talk automobile, espe-cially the car that sets the mark. Some machines are so well known that they do not need this kind of publicity to sell

operator of a machine not only have his operator's permit on him at all times when he is driving in that State, but that he must likewise have the card that is given at the time the license is procured and which acts as an identification card for the machine. If found without one or both of these cards the car operator is liable to find himself put to serious in-convenience.

Washington will have a second-hand car exchange within a few days. It is understood that the lease for the premises POTOMAC was signed yesterday. Those behind the proposition claim to have things so worked out that they will be able to take all used cars off the dealers' hands if they so desire. The disposal of the used car has long been the bugaboo of the automobile business. CENTRAL
